

QM Wizard standardizes processes and ensures high quality work. Use QM Wizard to supplement training to bridge the experience gap.

Optimize Workflows and Boost Technician Productivity

QM Wizard converts custom PDF forms and checklists into a digital data-capturing Quality Management, training, and transparency tool. Picture an electronic, step-by-step process that assesses entries against preset criteria and tolerances to standardize workflows and ensure high-quality results.

Functions

- Upload your PDF forms.
- QM Wizard converts your form fields into individual tasks in checklist format.
- Users enter results electronically.
- When optional criteria and tolerances are added to tasks, results are validated upon entry.
- Decision tree logic.
- Tasks initially appear in black in the Task Grid.
- Completed tasks (not violating any preset criteria) turn from black to green upon completion.
- When an entry violates preset criteria, the task turns from black to yellow, orange, or red depending on the level of severity.
- Administrators and Supervisors can track progress and review results and failure reports for all jobs.
 - Take photos and create electronic drawings.
 - Ensure only calibrated tools are used on jobs.
 - Technicians can request additional work. Approved new work is added to the task list.
 - The end result is a professional report based on your PDF form that can be emailed to your customer directly from QM Wizard.

Technology Designed for the Technician

QM Wizard is an electronic checklist, reporting, and data capture system providing:

- Improved quality management
- Standardized processes
- Consolidation of best practices
- Increased visibility and transparency
- Real-time data access and validation
- Continuous 24/7 web-based information flow

QM Wizard entries and reports update the other integrated data apps in the Spring Point Suite

- QM Wizard tasks can trigger status updates. Updates are visible:
 - Throughout MotorBase
 - On the Job Tracker
 - In the Customer Web Portal
 - In CRM
- Completed reports immediately become Job attachments in MotorBase and can be made available to your customers on the Customer Web Portal.
- Inspection, Maintenance, Repair (IMR) forms and checklists initiated in the Equipment Manager (EM) are completed in QM Wizard and become part of the items EM history.

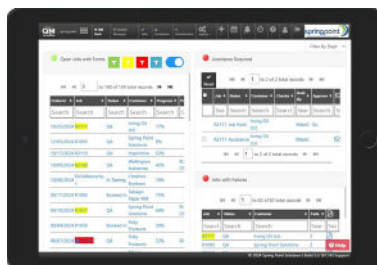

Process Reliability

Improve every procedure in any industry.

- Record inspection results
- Instant data validation
- Add criteria & tolerances to any task
- Create your own forms
- Create your own task lists
- Insert hold points
- Link videos & photos
- Embed instructions
- Embed reference material
- Use with tablets/mobile devices
- Attach photos & drawings
- Monitor progress
- Monitor failures
 - Multi-level failure options
 - Tailor actions following a failure to your process
- Audit trail provides history of each task entry
- Mobile access
- Dashboard provides at-a-glance progress and failure information
